CLAIMS

1. Aqueous floor cleaning and/or floor care composition containing, based on the total composition, at least 3% by weight of a nonionic surfactant of formula I:

5

OH
$$R^2$$

| |
 R^1 -CH-CH-(OCH R^1 -CH₂)_n-[OCH(CH₃)-CH₂]_m- O R^3 (I)

- wherein R¹ represents hydrogen or an alkyl radical having 1 to 18 C atoms, and R², independently of R¹, represents hydrogen or an alkyl radical having 1 to 18 C atoms, and the sum of the C atoms present overall in R¹ and R² is between 6 and 18, and R³ represents an alkyl radical having 4 to 18 C atoms, and R⁴ hydrogen or an alkyl radical having 1 to 6 C atoms and n is a number from 1 to 30 and m a number from 0 to 5.
 - 2. Composition as claimed in claim 1, characterized in that, based on the total composition, less than 3% by weight, preferably less than 1.5% by weight, of anionic surfactants are contained.
- 3. Composition as claimed in claim 2, characterized in that substantially20 no anionic surfactant is present.
 - 4. Composition as claimed in one or more of claims 1 to 3, characterized in that the composition contains at least one further nonionic surfactant which does not come under formula I.
- 5. Composition as claimed in claim 4, characterized in that the above-mentioned further nonionic surfactant is selected from the compounds of formula II:

$$R^{5}$$
-CH₂-CH₂-(OCH₂-CH₂)_n-[OCH(CH₃)-CH₂]_m - [OBu]₁ - O R^{6} (II)

wherein R⁵ represents an alkyl radical having 6 to 18 C atoms, and R⁶ represents hydrogen or an alkyl radical having 1 to 6 C atoms, and the mean

degree of ethoxylation n is a number from 1 to 30, the mean degree of propoxylation m a number from 0 to 5, and the mean degree of butoxylation I a number from 0 to 5, preferably 1 to 4.

- 6. Composition as claimed in claim 5, characterized in that in the above-mentioned nonionic surfactant corresponding to formula II R⁶ is hydrogen and m is 0.
 - 7. Composition as claimed in any one of claims 4 to 6, characterized in that, in the composition, said nonionic surfactant of formula I comes to at least a third and at most twice the weight of the further nonionic surfactant contained as claimed in any one of claims 4 to 6.
 - 8. Composition as claimed in claim 7, characterized in that in the composition the amount by weight of said nonionic surfactant of formula I is at least half as great, but not greater than, the amount by weight of the further nonionic surfactant included as claimed in any one of claims 4 to 6.
- 15 9. Composition as claimed in one or more of claims 1 to 8, characterized in that, based on the total composition, the amount by weight of the nonionic surfactant of formula I mentioned and, if present, the other nonionic surfactant included as claimed in any one of claims 4 to 6 comes to 5 to 35% by weight, preferably 7 to 20% by weight.
- 20 10. Composition as claimed in one or more of claims 1 to 9, characterized in that the composition contains polyethylene glycol and/or polypropylene glycol as the additional component.
 - 11. Composition as claimed in claim 10, characterized in that the above-mentioned polyethylene glycol and/or polypropylene glycol has a molecular weight in the range of 200 to 2000.
 - 12. Composition as claimed in any one of claims 10 or 11, characterized in that the above-mentioned polyethylene glycol and/or polypropylene glycol makes up 0.01 to 5% by weight, based on the total composition.
- 13. Use of a composition as claimed in one or more of claims 1 to 12 for30 the cleaning and/or care of floors.

E 10011 20

14. Use as claimed in claim 13, characterized in that the above-mentioned composition is diluted with water using a dilution factor of 5 to 5000, prior to use for the cleaning and/or care.

15. Use as claimed in any one of claims 13 or 14, characterized in that the
5 floors to be treated are uncoated or finished with a polymer film.
